Summary

I'm a full stack developer with 10 years experience specializing in e-commerce, fintech, real estate and education. I have a deep understanding of the latest technologies and am passionate about building beautiful web applications. I am seasoned in the fintech, realty, education & ecommerce sectors. I have an eye for beautiful but more importantly functional design experience. I am fully proficient in prototyping UX/UI and producing MVPs on the latest design application.

I also enjoy what I do, in my free time I have built beautiful and scalable products that I was able to successfully sell as a revenue generating business.

Currently I am thoroughly enjoying mastering React for its kickstart into Web3 and Shopify's CLI for their next-gen e-commerce experience. Recently I've made some Shopify themes and learnt liquid and became a Shopify Partner!

Let's chat

Experience

Full Stack Developer

Pulsee

Feb 2022 - Present (9 months +)

Sole developer for hybrid React and WordPress (headless) web application. Utilize Microsoft Visual Studio Code to develop and maintain code base powered by GitHub. Create markup designs of user interface webpages. Prepare and conduct test cases, strategies and test scripts for systems. Monitor and respond to system outages. Create and maintain SQL databases, reports and stored procedures ensuring privacy policies are met while efficiency maintained. Communicate directly with stakeholders on progress of applications. Receive input from end-users implementing changes as needed. Perform security audits on systems.
